

This Halloween, will you get a

TRICK OR TREAT!

from big health insurance companies?

WHAT'S REALLY SCARY THIS HALLOWEEN?

Big Health Insurance Companies continue to try to kill health care reform and spread lies about providing quality, affordable health care to you, your family and everyone in America!

Whether you and your family already have health insurance or you are uninsured – the bills Congress is considering right now will improve your health care and stop insurance companies from denying and delaying health care.

The insurance companies are trying to kill reform and protect the status quo. The health insurance companies are spending \$641,000 a day to oppose reform because they profit by keeping the system as it is ... by denying claims, raising premiums, co-pays and deductibles at will, making health care decisions instead of our doctors, and denying care because of pre-existing conditions.

The insurance companies have a total stranglehold over health care. They make record profits. They make the decisions. They put profits before people and do so at our expense. And they're giving millions in campaign contributions to win reforms that will add billions more to their profits and do nothing for the rest of us.

So the question in this debate is who wins — the insurance companies or us? If they win, we lose. That's why hundreds of thousands of Americans across the country are coming together to demand reform. That's why the nation's leading physician, nurse, hospital and senior groups, large businesses and small businesses, and major faith organizations of every denomination all support reform.

Tell Congress to take our side. We want good health care we can afford with the choice of a strong national public health insurance option. We need a bill out of both the Senate and House of Representatives that makes health care truly affordable or our families and businesses, gives us true choice and competition, and requires shared responsibility between employers, individuals, and government. Congress must pass health care reform that works for us, not the insurance industry. If the insurance companies win, we lose.

Call your Member of Congress today and tell them you support quality, affordable health care for ALL! Calling on the weekend and leaving a message is OK – pick up the phone and do it now - so our kids don't have to worry about a scary future of high cost health care or no health care at all.
